'AAA CERTIFICATION', WITH EVERY INSTALLATION

Furnaces are complex and technical, and are an intricate piece to your home comfort system. It's been said that the furnace is the heart of your home!

Did you know that the **MOST IMPORTANT** day of your equipments life is the day of installation?

This is why we take our 'equipment installation quality' to an **UNMATCHED LEVEL**, with each and every install.

Every furnace is prepped, tested, and inspected in our production facility **BEFORE** it ever arrives in your home. This is extremely important because modern, high-efficiency furnaces utilize gas, electrical, plumbing, and specialized controls on a daily basis. For your safety purposes, proper functionality, and for the longevity of the equipment, we **GUARANTEE** our '**AAA Certification**' standard on every unit that leaves our facility.

There are a lot of misconceptions about heat pumps out there. **PROPER SIZING, SPECIFICATION, and INSTALLATION** of each unit is **CRUCIAL** for the optimal performance and efficiency of the system.

With our '**AAA Certification Guarantee**', we verify and ensure that every unit is properly sized and spec'd to suit your unique needs.

Each and every heat pump and air conditioner is prepped, tested, and inspected in our production facility **BEFORE** it arrives to your home. This allows us to ensure that our '**AAA Certification**' standard is upheld and delivered to every customer, resulting in a **CONSISTENT** and **EXPECTED** outcome with every installation.

When purchasing home comfort equipment, you are making a decision that will impact the next 20 years of your life. You **DESERVE** quality you can bank on!

Tankless water heaters, not unlike heat pumps, are pieces of home comfort equipment that are often misunderstood. Not all tankless water heaters are created equal.

Here at Handy Bros., we source the **HIGHEST QUALITY** of **PRODUCT** and ensure the **HIGHEST QUALITY** of **INSTALLATION** with each and every unit we install.

With our '**AAA Certification Guarantee**', we ensure that **ALL** tankless water heaters are prepped, tested, configured, and inspected **BEFORE** they leave our production facility. When prepping any piece of home comfort equipment, servicability, code specifications, performance factors, and visual appeal is all taken into consideration. This allows us to deliver a **TOP TIER** product, **CONSISTENTLY**, to every customer.

Remember, the **MOST IMPORTANT** day of your equipments life is **INSTALLATION DAY!** Minimize your chance of regret with Handy Bros. '**AAA Certification Guarantee**'.
