Harry Antle Died This Morning

Lived Here for 32 Years, Coming From Newfoundland in 1907—Was Injured Two Weeks Ago

Over two weeks ago, Harry Antle was loading some logs on his truck out at Allison Creek. He was balancing himself on the edge of the truck, getting a log placed on top of the load, when he fell backward, and the log rolled on him.

He paid little attention to the incident at the time, and continued working, but two or three days later pain developed which compelled him to go to hospital on Monday, July 10. Complications must have developed, and so serious did his condition become that Drs. Claxton and Rose of the hospital decided to call a specialist from Calgary, Dr. W. Merritt, for consultation on Wednesday, who arrived late in the day. Despite all that medical aid could do, death came at 6 a.m. this morning.

Deceased was born in Trinity Bay, Newfoundland, in 1881. Coming to Coleman in 1907, he first worked at the International mine, later establishing a livery and dray business in partnership with Joe Plante. For over twelve years he carried on the business under his own name. He also owned a farm a mile north of Coleman, where with his family he lived. He was married to Miss Margaret Hogan in St. Paul's United Church, Coleman, and there are two daughters, Mrs. John Feavey, formerly a teacher here, and Laura, attending high school. Though not definitely stated, it is likely the funeral will be held on Sunday afternoon.

New Ambulance for Miners' Hospital

There arrived last week a smart looking Ford motor ambulance which will eliminate much of the discomfort and inconvenience of moving injured men from the mines to the hospital. It is equipped with a portable cot on wheels with springs and mattress, so that an injured man can be moved without causing unnecessary shifting and pain. It will be housed in a garage beneath the surgery of the miners' hospital, so that it will be ready for use at all times. Heretofore injured men were brought to hospital on a stretcher conveyed in an open mine truck.

Roy McLeod Injured

Roy McLeod, 15-year-old-grandson of Mr. and Mrs. Andrew McLeod, was injured in the head by falling from a horse in the vicinity of Lee Lake while journeying to Beaver Mines for the local stampede. Tommy Flynn telephoned in and Doug Moores brought him in his car to the miners hospital. On Wednesday morning he was reported to be resting comfortably.

Your Week's Groceries

Attention is directed to the specials advertised in the Ad. Bulletin published by The Journal for Tip-Top Grocery, Ed. Ledieu, manager. They will prove real money-savers and the quality is THE BEST. Deal with your home town merchant for service and satisfaction, the store where "reasonable prices and quality reign."

Develop Coleman trade by advertising in this paper.

SENATOR W. A. BUCHANAN of Lethbridge who urged People of this district to support Liberal Party at Friday's Rally.

Carbondale Hill to be Surfaced

Official Word Given This Morning That Work Will Include Section Originally Left Out

Word was received this morning by Mr. Albert F. Short, from Rev. Roy C. Taylor, M. L. A., of Pincher Creek, is to the effect that the Carbondale hill will be surfaced. Letters were sent to the Public Works department, Edmonton, protesting that this had been left out of the surfacing plans, which originally included from Bellevue to the east side of Coleman. The decision of the department will certainly meet with popular approval, for it would have been most unfair to have left out this section.

A sound railway structure is needed to protect railway labor in Canada.

Local Players Star in Tennis Tournament

Balloch and Roughead Win Four Finals—Runner-Up in Two Others—Place Coleman on Tennis Map.

Smashing their way into six finals and winning four in the recently completed provincial tennis tournament at Lethbridge, Bill Balloch and Chick Roughead are to be congratulated on their splendid achievements. In no other year have Coleman players so forcibly demonstrated their ability in provincial tennis circles. In view of their performances there is little doubt they will be ranked high in the provincial rankings, usually released in the Fall.

Balloch reached the finals of the three main competitions. In the men's singles he again bowed before the superior play of champion Bill Stark, although in the first two sets the crowded galleries were treated to some spectacular tennis; the scores were 8-6, 6-0, 6-0. In the men's doubles he teamed with Stark to subdue their Edmonton opponents in three straight sets. In the mixed doubles, teamed with Mrs. Kay Wilson to reach the final, they were outclassed when they tried to match strokes with Ernie Anderson and Mrs. Eustace, who have held the championship many years.

To Chick Roughead goes the title of "Iron Man" of the tournament. In the first two days Chick did not do so well, being defeated in all the main events with the exception of the Ferris Cup. Evidently he became tired of being a stepping stone for other players, for then on he literally wiped the courts with his opponents. He was in so many competitions on the last day that he was advised to ease up on some and as a result lost out in two secondary events. However his determined bid for the Ferris Cup continued strong and he routed his final opponent, Poxon of Carbon, to win by scores of 6-4, 6-0, 6-4. This event is open to all players with the exception of seeded players. Chick also won the secondary men's singles and the Visitors' singles. It is interesting to note that in the five years of the latter competition's existence, Coleman players have won it four times; Balloch won it the first year and Shone the next two years.

Broadcasting the games was an added feature to those interested in the progress of the Coleman players, a Lethbridge garage sponsoring the broadcasts. Both Balloch and Stark were presented by the garage with certificates to service their cars with oil while in the city.

In buying from Journal advertisers you buy from merchants who believe in Coleman by co-operating with their home town newspaper. They set a good example and really merit your business. It is good business for they offer the best quality goods at fair prices.

J. S. D'Appolonia has received a contract for the erection of an annex to Bellevue Inn, and the contract for building a modern bungalow for D. Convery, of Hildreath.

It won't sell if you hide it under a bushel basket—use Journal want ads.

Pincher Creek and Crows Nest Pass Zone of Macleod Constituency Organized at Enthusiastic Meeting Friday.

F. O. McKENNA, National Liberal Candidate, who gave a stirring address on Principles of National Liberalism.

About 150 people from all parts of Pincher Creek and Crows' Nest Pass areas attended the meeting on Friday last, addressed by Mr. F. O. McKenna, Liberal candidate for the federal constituency of Macleod, and Hon. W. A. Buchanan, of Lethbridge. Organization of a zone general committee occupied some time following the opening of the meeting, which became rather tiresome to those who had come particularly to hear the candidate. However, after nearly two hours of discussion, which was very tiresome to the majority, Mr. McKenna launched into his subject, dealing with the objective of the Liberal party and its part in national affairs.

Of particular interest to the Crows' Nest Pass workers was his statement that he would urge the reduction of the age limit among mine-workers for the old-age pension, as their's was a much more hazardous occupation than most others. He dealt with the lack of co-operation on the part of the Alberta government with the federal authorities, resulting in a lot of harm to Alberta, most important of which was its failure to take advantage of the national housing scheme, through the obstructions of legislation by Alberta's government.

Hon. Senator Buchanan dealt with the national viewpoint of the Liberal

party. There may be other parties, but they are not national. For example, Social Credit was represented only in Alberta, and two members from Saskatchewan, who had contributed nothing towards solving national problems. They were not a national party and he ventured the opinion they never would be, citing the history of similar parties that had existed for a short time and then passed from the scene.

H. Rosenberry, former Liberal member for Pincher Creek, urged all to support Mr. McKenna. Coleman was represented at the meeting by quite a number of Liberal supporters.

The committees for various political sub-divisions were appointed, as follows: H. C. McBurney, J. S. D'Appolonia, J. J. McIntyre, Coleman; C. J. Tompkins, B. Funguelli, L. L. Morgan, Blairmore; A. Sherring, S. Brobrosky, Frank; J. Kubasek, G. Youngberg, sr., A. Boutry, Bellevue; W. Carpenter, A. Grant, J. Norton, Hillecrest; J. Welsh, Mrs. J. Welsh, Passburg; A. M. Densmore, Mrs. J. F. Smith, Mrs. H. Carswell, Lundbreck; H. Lemire, J. McKay, G. Forter, Cowley; F. Robbins, E. Conolly, J. Ennis, A. Hammond, Pincher Station; H. Rosenberry, E. Marcellus, J. J. Braniff, Pincher Creek; R. Mungson, J. Johnson, F. McLaughlin, C. Ray, Brocket.

Town Council Notes

Regular meeting of council held on Tuesday evening. Present Mayor Pattinson, Councillors Antrobus, Atkinson, Kerr and Balloch. Absent Councillors White and Chapman.

Council granted permission to Rudy Alexander to secure a fuel oil license from Dept. of Trade and Industry. He will build a garage and service station costing \$5,000 alongside the Empire Hotel.

Council granted permission to Hayoom's Drug Store to secure trade license.

Walter Smalek asked council to have Coleman Light & Water Co. install lights into his home.

A letter was received from Edmonton stating that Mrs. Vollen-dorf was a town charge. The town will make further efforts to prove otherwise. A list of clothing submitted by Mrs. Vollen-dorf was granted.

Joe Stevenson was granted material valued at \$40 to repair one of his homes on Third street. He was told to report his progress at the next regular meeting.

Chief of police was authorized

to have all street lights burning three quarters of an hour earlier than at present.

A delegation from the town band asked for a grant with which to buy new uniforms. (Continued on Page Eight)

Sailing on The Great Lakes

Canada's "Pocket Ocean Voyage" from Fort William to Port McNicoll, by Canadian Pacific Great Lakes Steamships is a unique 542-mile trip with all the thrills of ship life.

The Canadian Pacific steamships Keewatin and Assiniboia take slightly more than a day and a half for the voyage through lakes and rivers, a good deal of the route being along pretty shoreline but some of it completely out of sight of land. From beautiful Georgian Bay on the east, the ships pass into Lake Huron whose length of 207 miles and width of 101 miles make it the second largest of the Great Lakes.

Then comes the lovely St. Mary's River, the international boundary, and the last part of the voyage is through Lake Superior, largest fresh-water lake in the world.

The sturdy Clyde-built Canadian Pacific steamers are luxuriously fitted for this summer service. Each ship has seven attractive deluxe rooms with private bathrooms, five of the seven being equipped with twin beds and two with double beds. All rooms have running water and there are lights in every berth. Public and private bathrooms have tile flooring, built-in bathtubs and showers. The public rooms are beautifully finished.

High class services includes barber, hairdresser, manicurist and valet. There is an excellent dance orchestra aboard and the cuisine is famous. Both steamers are fully equipped for deck sports, there being facilities for shuffle board, ball board, deck quoits, and deck golf.

Regular sailings, from June 17 to September 16, provide for two eastward and two westward trips each week, the Great Lakes provide an alternate route — air-conditioned by Mother Nature — on a cross-Canada trip, or a distinctly unusual type of summer holiday affording the pleasure of ship life on the calm waters of the great inland seas.

BIG BEN TOPS 'EM
ALL FOR FLAVOUR!

Value In Vacations

Every farmer who can possibly do so, should contrive, by the exercise of a little ingenuity, to plan for himself and family a holiday before the snow flies, even if it is only the matter of two or three days, and though it has to be done on a very modest scale and on an extremely slender budget.

For the great part of ten years now, farmers on the prairie for the most part have been subject to a heavy and consistent bombardment of the slings and arrows of misfortune. The great majority have stood up against grueling punishment with a courage and fortitude that have been the admiration and astonishment of visitors, and have come up smiling.

True, there are some who have succumbed to the disasters attendant upon a prolonged and severe depression. Some have left the country to seek better fortune elsewhere, a few have died prematurely as a result of disease occasioned by worry, privation and disappointment, and a handful have taken the quick way out by their own hands. But the number who have succumbed is surprisingly small, constituting a remarkable testimonial to the indomitable spirit of the man on the land.

Neither are the courage and fortitude which have enabled him to weather the storm with a stout heart confined to the tiller of the soil. His faithful helpmate, who has stayed by her husband and children, through what must have seemed aeons of daily drudgery tempered by nothing more than an occasional faint gleam of hope for something better in the remote future, should have a high place in the saga of heroism and courage which have marked their course through a multiple "forty days and forty nights".

The Little Woman

No paeans of praise can do justice to the "little woman" who has not only kept the home fires burning for so long under adverse conditions, which cannot be realized by those who live among the comforts and conveniences of the city, but has often enough, by a timely smile and an encouraging word, snatched her man from the abyss of despair.

And so it is not amiss, after the long travail and distress of the wilderness, to suggest that a holiday—a change of some sort—is due the farmer, and still more to the faithful wife and homemaker, who has not even had the small opportunities for brief releases from her life in the remote place whose business sometimes forces him afield, perchance in search of feed for his livestock or on some other mission connected with his efforts to keep his head above water.

No monument is likely to be erected in any public square to the man on the land who has seen his plain duty clearly and has followed right no matter how dimly it may have burned, and even after it may seem to have vanished for ever. No public recognition will be given to the heroism of the man whose business sometimes forces him afield, perchance in search of feed for his livestock or on some other mission connected with his efforts to keep his head above water.

No monument is likely to be erected in any public square to the man on the land who has seen his plain duty clearly and has followed right no matter how dimly it may have burned, and even after it may seem to have vanished for ever. No public recognition will be given to the heroism of the man whose business sometimes forces him afield, perchance in search of feed for his livestock or on some other mission connected with his efforts to keep his head above water.

A Change And Rest

It has been said that a change is as good as a rest. If there is any truth in this—and who can doubt it?—it predicates the ability to get a rest, even though it does not involve a change of venue of more than a dozen miles or so, with very little cost. It would be out of place to suggest how it might be done. There are so many ways which can be made to fit the circumstances and the environment of the individual. Many a brief holiday has been enjoyed with little more equipment than a wagon, a tarpaulin and a team of horses.

The rest and the change afforded by a holiday, no matter how brief and unpretentious, can be counted upon to pay dividends in the form of improved spirits, better health and a brighter outlook on life. Many a cheap holiday has saved much greater sums in doctors' fees and hospital charges, and even funeral expenses.

Moreover, the pleasurable anticipation which goes with the laying of plans for a change of scene adds much to the value of a vacation.

Patience Rewarded

The Fisherman Reaps Something For His Patience

The proverbial patience of the fisherman is being rewarded. But whatever the size of his catch, he reaps an intangible but none the less valuable reward. His quest takes him under the open sky. It brings him the tonic of rolling sea and flying spray, or the benediction of the still lake touched with the colors of the afternoon glow. It sends him back refreshed and better equipped, perhaps, to evaluate more nearly in their true proportions the perplexities and irritations of workaday life.—New York Times.

The Rio Grande channel at San Marcial, N.M., is eight feet higher now than it was 45 years ago because of silt deposits.

The financier in the back shop tells us that it is better to give than to lend, and it costs about the same.

Blood Donors

Soviet Russia Organizing Army For National Defense

An army of Soviet Russian blood donors, including many women, is being organized for national defense. The movement to register blood donors became popular last summer during the vest-pocket border war between Russian and Japanese-Manchoukuo forces at Changkufeng. Now the institute of blood transfusion is registering a regular army of "active" donors. Thousands of others are sought for a blood donor reserve.

Women especially were being enlisted since they likely were to stay at home while the men would be at the front.

There does not seem to be any "primitive" Buddhist sculpture, says an art curator at the Metropolitan Museum; it began "full-blown" about 250 B.C.

An electric eel at the New York World's Fair zoological exhibit is capable of electrocuting a man, but attendants handle it with rubber gloves.

Hudson Bay is not a bay, but an inland sea. 2317

Photographer Had Troubles

Found Assignment To Get Picture Of Crying Baby No Snap

Bawling babies are the bane of a photographer's life. Happy babies are found by the dozens, but one cameraman says he hopes his assignments to photograph howling little ones are few and far between. Called upon to get a picture of a wide-mouthed crying infant, he roamed the streets of Toronto for several days and each time he thought he had his subject, the child stopped yelling, looked at him and smiled. "I seem to have the kind of face that appeals to children," he said woefully.

Finally, after numerous attempts, he was called to an institution, where nurses said they had a perfect model in action. He dashed out immediately, but this child, too, was inspired by the photographer's friendly face and stopped wailing at once. In disgust the photographer turned away to pack up his equipment, when the resourceful nurse quietly gave the little like a tiny pinch and the performance was on again. The resulting photo disclosed a perfect specimen and just what the customer had ordered.

Receives New Honor

Sir Harry Oakes Made Member Of Bahamas Legislative Council

Sir Harry Oakes, Canadian mine owner and financier knighted by King George last June, had a new honor conferred on him by His Majesty who made him a member of the Bahamas Legislative Council.

This council functions in a manner similar to the House of Lords. Sir Harry's appointment to the upper house automatically leaves vacant a seat in the elective House of Assembly, which the financier held.

Sir Harry, who staked Lake Shore Gold Mine in Northern Ontario, has resided in the Bahamas since 1935.

Will Not Be Hardship

Occupants Of Australia's Vice-Royal Residence Must Climb Stairs

The Duke and Duchess of Kent have been occupying a good deal of time with arranging their future home—Yarralumla, the residence of the Governor-General of Australia. It seems strange that in a house so modern (Yarralumla was built as recently as 1936) there is no lift to the main floor on the third floor. Fortunately, the Duke and Duchess regard exercise as good for their health and figures, and in most ways the house makes great appeal to them. It is roomy, cool, peaceful, set in pleasant gardens and in restful scenery.

Civil Aviation

Small Increase Is Shown In 1938 Over 1937 Figures

Civil aviation registered a modest increase in 1938 over 1937, according to composite figures released by the bureau of statistics.

Light aeroplane clubs increased from 22 to 23 and membership grew from 1,194 to 1,240. The number of flights by all aircraft was 205,175, an increase of 14,772, and mileage was 11,652,421, compared to 10,750,294.

Total personnel carried was 395,357, compared to 359,055. Paying passengers dropped from 110,864 to 101,594 but non-paying passengers increased from 30,294 to 33,898.

Destructive Oil

Refuse of oil-burning steamers, pumped on the sea, destroys each year tens of thousands of birds, together with the eggs and young of important food fishes and the forms of life that fish eat. The remedy is to force responsibility upon the shipping interests, says Our Dumb Animals.

South Africa Benefits

Fugitives from persecution in Europe have introduced about 200 new industries into South Africa, according to a census completed by the government authorities in Capetown. Nearly 3,000 jobs have been created in the Union and of these the greater number are filled by South Africans.

Not A Great Menace

Rust does not offer the same menace to grain crops as in other years. A great percentage of the west's 24,000,000 acres of wheatlands are growing rust-resistant grain, a protection against attacks that have taken a toll of many millions of dollars.

Monday best day for holidays—Headline. Yes, and Tuesday, Wednesday, Thursday, Friday and Saturday are not bad either.

About 500 classes of products in 100,000 varieties of sizes, shapes and finishes, are produced by the steel industry.

Giving A Lift

What Happened To A Man Who Was Flagged On The Highway

"He looks like a clean-cut young fellow; let's give him a ride." That's what many people say daily when they are flagged by hitchhikers on the highways, and that's what George G. Hall, a Detroit oil promoter, remarked to his companion when a young man of good appearance thumbed them near Grand Rapids a few days ago.

And what happened? The "clean-cut young fellow" took the back seat behind Hall and his companion. They chatted amiably enough for some time and then a report rang out. Without warning or provocation, the "clean-cut young fellow" had shot the owner of the car in the back in a particularly cowardly manner. The young woman with him (who was at the wheel) was ordered to keep quiet and to continue to drive. When finally she surrendered the wheel to the "clean-cut young fellow" it was to allow him to die in her arms.—Brookville Recorder and Times.

Decline Of The Male Quartet

Foursome Harmonizing Seems To Be Almost Thing Of The Past

Add to America's things to view with alarm the fact that only 16 towns in seven states sent male quartets to Tulsa, Okla., where the "world championship" in masculine foursome harmonizing has just been decided, with only a touch of solemnity but quite a lot of old-fashioned fun.

What has happened to all our male quartets, impromptu or otherwise? Don't men sing any more, singly or together? Barber shops even in the hinterlands have gone tomcatish, but if only seven states have quartets that can do fearful things to the banks of the Wabash and keep all sour notes away from Sweet Adeline, maybe this is what's wrong with the country.—Philadelphia Inquirer.

According To Astrologers

Climax Of Hitler's Career Will Be Reached In September

Chancellor Hitler maintains an advisory staff of five astrological aides, the stars and tell him what the future holds. Dr. Nicholas Murray Butler said on arriving at New York from Europe.

"At the present time," Dr. Butler said, "the advice of these wise men is that the climax of Hitler's career will come early in September and that whatever he is to do to add to his fame must be done before that date."

This may sound like nonsense, but is the sort of nonsense which may easily give to modern civilization another terrific shock.

A Scientific Marvel

One of the scientific marvels of all times, states Neal O'Hara, in the New York Post, is the operation of your nasal passages, which, in the course of a day and in a space of three inches long and less than two inches wide, air-condition at least 500 cubic feet of air that enters your lungs.

Dresden, Germany, will have motor buses with over 100 seats on top.

World's Largest Flower

Bloomed In Two Hours At Bronx Park, New York

In two hours the Giant Krubi of Sumatra in the Botanical Gardens of Bronx Park, New York, grew from a thick stalk into an inflorescence nearly four feet in diameter. This was the second blooming in the Western Hemisphere of the largest flower in the world.

The first specimen of the plant, Amorphophallus titanum, attracted thousands of visitors, when it bloomed at the garden in 1937. Nine days after it bloomed the plant, then eight feet high, died. No Giant Krubi ever has bloomed a second time in cultivation.

Thomas H. Everett, horticulturist of the gardens, who has made a careful study of the first plant, was put in charge of the new corn obelisk in Sumatra in 1935 by Boris A. Kruckoff, an explorer and naturalist. The new specimen weighed only 31 pounds, as compared with 125 for its predecessor.

Mr. Everett found that the runners of the mother plant reach out more than ten feet from the corn if unhampered. The corn had been planted in a box late in 1937. In May he removed it from the box and set it out in a shaded greenhouse so that its runners could roam among the roots of its jungle contemporaries.

Prominent horticulturists watched the blooming. The original bulb, more truly a corn, has always died in the half dozen times it has bloomed in cultivation since it first was displayed in Kew Gardens, England, in 1889, after its discovery in Sumatra by Dr. Orazio Beccari, an Italian botanical collector.

Attendants will keep the shade, humidity and temperature of Greenhouse 10 as near as possible to those of the habitat of the plant in Sumatra. They hope that one or more of the roots will live and set a new corn after the demise of the parent flower.

Health Of Workers

Employers Keenly Alive To The Value Of Sickness Service

Judging by the unprecedented response to the government's current questionnaire on sickness service available to workers throughout Canada, Canadian employers are "keenly alive" to the value of such services, according to a health department statement.

Although the questionnaire was sent out to 12,000 employers quite recently, replies have been pouring into the government, many accompanied by letter expressing eagerness to obtain any advice the government could give concerning maintenance of their employees' health.

Sports Centre In East

Plans to establish a summer and winter sports centre in the Laurentian mountains, northwest of Montreal, are under way, it was learned. The immigration department said a small number of key men from Austria, now part of Germany, have been granted permission to enter Canada. The project will be financed by European capital.

New Anti-Aircraft Gun

Operated By Electric Eye And Releases Fifty Shells A Minute

New anti-aircraft guns, aimed by an electric eye and capable of hurling 50-pound shells seven miles at a rate of 50 a minute, now ring London, the London Star, evening newspaper, declared.

The newspaper said every airplane coming near the city day or night is reported and "covered" by these guns as a practice manoeuvre.

The crew is 50 yards from its gun, the Star said, and spots a plane by a detector. A pointer tells the crew the correct elevation and automatically sets the shell fuse, taking into account the speed of the plane.

British Foreign Office Refers To Talk Of Peace As Fantastic

London.—The foreign office spoke out about what it called "fantastic and irresponsible talk" of an impending broad agreement with Germany to save European peace. It denied there were official negotiations of any kind.

"All talk of a large loan to Germany in return for partial disarmament is absolutely unoffensive and purely academic, and moreover is harmful because it may prejudice the Anglo-Soviet talks," the foreign office spokesman said.

Dr. Hellmuth Wohlthat, German trade ambassador, returned to Berlin from London and denied having conducted any negotiations for a general loan for Germany.

A scheme to grant Germany a loan of \$4,680,000,000 and international colonies in return for general disarmament and supervision of Germany's arms industry was said in some quarters here to have been drawn up by Robert Hudson, secretary for overseas trade.

Hudson was said to have mentioned the scheme to a number of members of the government but a foreign office spokesman said: "The scheme is unknown to Lord Halifax, it is unknown to Wilson; it is unknown to the prime minister. It is fantastic."

"Before any scheme for a general settlement can be considered by the British government," the spokesman said, "there must be some evidence of Germany's willingness to change her policy."

"For example it is extremely unlikely that Britain could ever negotiate a settlement as long as the Germans are in Prague."

A rumor, published by the Daily Mirror (Independent), was that Chancellor Hitler already had hinted a readiness to promise Europe peace on condition that he get a \$500,000,000 loan, "backed by all the democratic powers."

In Paris Ambassador William C. Bullitt's secretary said that Bullitt had not sent to Washington any report that Britain, France, Poland, Germany and Italy had tentatively reached a 25-year peace consolidation agreement. Bullitt and American Ambassador Joseph P. Kennedy were mentioned in a copyright despatch in the Philadelphia paper as possibly having sent to Washington a report of such an agreement.

Study Coal Field

Ontario To Secure Information About Estevan Lignite Operations

North Bay, Ont.—Col. Mac Lang, chairman of the board of the Temiskaming and Northern Ontario railway, said he plans to go west to study operations in the Estevan coal field in southern Saskatchewan.

Information gained will be used to determine methods of developing the Onakawana soft coal deposits, 126 miles north of Cochrane, Col. Lang said.

Col. Lang said the Estevan deposit, centre of a big lignite mining industry in Saskatchewan closely resembled the northern Ontario deposit.

Argues Advantages Of Alaska Highway Route Through B.C.

Vancouver.—The Canadian section of the international British Columbia-Alaska highway commission has received no instructions to include consideration of an alternative prairie route through northern Alberta to Alaska, Hon. Charles Stewart, commission chairman, said.

He made the statement in reply to a question by Howard Mitchell, president of the Vancouver board of trade, which tendered a brief on the project to the commission.

"I have only heard of this matter by rumor," said Mr. Stewart. "I have asked the Dominion government for particulars, but there has been no enlargement of the inquiry."

In its brief the board of trade argued advantages of routing the highway through British Columbia, stressing the fact a coastal route would permit economic servicing of the road through lower transportation costs to coast points such as Prince Rupert, Stewart, the Stikine river and Skagway, Alaska.

Mayor C. E. Scanlan of Kamloops,

World Wheat Situation

Britain Urged To Purchase War Reserves To Aid In Price Recovery

London.—The Financial Times called on the government to ease the world wheat situation by augmenting war reserves of the cereal and to strengthen its hand internationally by judiciously placed purchases.

The newspaper said in an editorial that if wheat prices do not recover to a more remunerative level, increasing financial stringency will result in producing countries with a resultant loss of markets for imported goods.

The editorial said Britain could take advantage of the urgent need of the wheat growing countries to unload supplies to break the economic stranglehold the totalitarian states are seeking to impose on Central European and South American countries.

The newspaper admitted that problems would arise. If the government decided to buy from Roumania and Argentina it would be forced to consider the rival claims of Canada and Australia.

Port Of Trieste

Italy May Grant Germany Special Privileges To Aid Business

Rome.—It was understood in Rome that negotiations are proceeding whereby Italy will grant Germany special privileges at the port of Trieste to aid the business of the port by diverting to the Adriatic much traffic now routed through Hamburg. Negotiations are believed to be near conclusion. Germany, however, is reported to be hanging back on taking over the complete rehabilitation of the port, even on terms favorable to the reich.

It has been first reported that Germany was to be given a 10-year lease to Trieste and would transform it into a modern port with all facilities.

Refugee Problem

President Roosevelt Invites Conference At White House In September

London.—President Roosevelt, in a new effort to solve Europe's refugee problem, invited officers of the inter-governmental committee on refugees to meet him in a two-day conference at the White House the first week in September.

The invitation was conveyed to representatives of Britain, France, Brazil, Argentina and The Netherlands by Myron C. Taylor, the American delegate.

Acceptance of the invitation is expected as soon as the officers obtain approval of their governments.

Canadian Honey In Australia

Sydney, Australia.—Three tons of Canadian honey, sent experimentally for sale in Australia, are meeting an uncommonly large demand and it is expected bigger shipments will follow.

For National Emergency

Plan To Register Canadian Women From 16 To 65

Toronto.—Between 4,000,000 and 5,000,000 Canadian women, from 16 to 65, will be invited to fill in a questionnaire in the next six weeks by provincial committees of the voluntary registration of Canadian women, Margaret Hyndman, chairman of the executive committee, announced.

Ontario will be the first province to establish a registration bureau. A meeting of the provincial committee will be held in Toronto, Aug. 1, when plans for establishing bureaux in the larger business buildings will be discussed. A week later Senator Iva C. Falla, national chairman, and Miss Hyndman will leave for a western tour to arrange for provincial and local organization.

The questionnaire is designed to cover completely qualifications and desires of Canadian women who wish to give service in a national emergency.

Women will be asked if they can take children or adults into their homes. They will be required to tell their physical condition—whether their eyesight and hearing is normal. If they can be active on their feet for six hours daily.

Organizing ability for camps and recreational groups of public institutions, experience in catering, buying or cooking food in large quantities is included.

With regard to women taking an active part on farms, the survey asks in detail the experience and training in "shearing sheep, wool processing, curing, canning, commercial preservation of food, operation of farm machinery, poultry and dairy farming."

Examples of more technical forms include in detail the experience and training in "shearing sheep, wool processing, curing, canning, commercial preservation of food, operation of farm machinery, poultry and dairy farming."

To Meet In Canada

Chambers Of Commerce Of British Empire To Meet Here In 1942

London.—The congress of Chambers of Commerce of the British Empire voted to hold its 1942 meeting in Canada, the city to be decided by members of the Canadian delegation to the present congress.

Canadian delegates said a decision as to the place of the 1942 meeting would probably be made while they were travelling home or soon after their arrival.

Canadian Women Pilots

Winnipeg.—Canadian women pilots may be used as flying instructors in the event of a national emergency, Wing Commander A. T. Cowley, R.C.A.F., Ottawa, said here in an interview. At present there are 40 Canadian women who had trained as pilots, he said.

Portrait Presented To Famous Agriculturist

At a dinner given in his honour at Regina, Sask., by former associates and admirers, Hon. Dr. W. R. Matherwell, former Provincial and Dominion Minister of Agriculture, was presented with a portrait of himself, the work of Ernest Fosbery, R.C.A., of Ottawa. Dr. Matherwell, now in his 80th year, is a member of Parliament for Melville, Sask. Born in Ontario, and a graduate of the Ontario Agricultural College at Guelph, Dr. Matherwell travelled west in the early eighties. He was elected to the first legislative assembly of the new Province of Saskatchewan in 1905, and has been a constructive and conspicuous leader in Canadian agriculture for nearly 60 years.

WORLD'S POULTRY CONGRESS

Fred C. Elford, Special Poultry Commissioner for Canada, who is assisting in arrangements for Congress at Cleveland, July 28 to August 7th.

Protest Czech Entry

Montreal Workers Adopt Resolution Opposing Shoe Plant

Montreal.—A resolution protesting "energetically" against the entry to Canada of 250 Czechoslovak technicians for the Bata shoe firm was adopted at a mass meeting of workers in the shoe-manufacturing industry here.

Roual Trepanier, vice-president of the Trades and Labor Congress of Canada, told the workers that projected establishment of a Canadian plant by the Czechoslovak firm would increase unemployment.

The Bata company has taken an option on a site at Frankfort, Ont., near Trenton, for a factory.

Unlucky In Safety Drive

Vancouver's Third Attempt Came To End In Four Days

Vancouver.—Vancouver's third attempt at "100 Deathless Days" campaign ended four days after it started, when W. A. Hanna was fatally injured in a traffic collision.

The elderly visitor from Kamloops, B.C., died in General hospital less than an hour after the car he was driving was in collision with a passenger-filled bus at a suburban residential intersection. The bus driver and 26 passengers escaped with a shaking up.

Hanna's death was the sixth fatality since the city started its first safety campaign July 1.

Flying Boats Chosen

Montreal.—Imperial Airways flying boats Cabot and Caribou will be used on a regular weekly schedule for trans-Atlantic air mail service with the first flight scheduled for Aug. 5. Trans-Canada Airlines reported it had been informed in a cable from Imperial Airways.

Crisis Is Reported In Spain Following Split In Franco's Forces

Submarine Safeguards

Plan For Protection Of Undersea Craft During Diving Tests

London.—New safeguards during diving tests by submarines were announced by the government as a result of the sinking of the British submarine Thetis in Liverpool bay, June 1.

Geoffrey Shakespeare, financial secretary to the admiralty, said henceforth a naval vessel capable of communicating with a submerged submarine will attend diving trials and the submarine itself will tow a marking buoy so that her position will be known throughout the test.

The Thetis was not located for many hours after the time when she should have emerged from her fatal tug. She was attended by only one tug.

The admiralty is planning also to experiment with telephones and lights to be placed within the marker buoys, and a device is being designed to prevent torpedo tubes from being opened from within the submarine when their outer caps have opened and the tubes are flooded.

The Thetis testimony indicated a fatal failed to show that one of the torpedo tubes was filled with water. This was followed by opening of the tube and flooding of a compartment, resulting in the tragedy.

Action Against Terrorists

British Government Asks Power To Stamp Out I.R.A. Campaign

London.—The government has asked parliament to empower the government to stamp out the Irish Republican Army terrorist campaign in Great Britain.

Sir Samuel Hoare, home secretary, introduced a bill in the House of Commons to empower the government to deport or refuse entry into Great Britain of men and women suspected to be connected with the I.R.A. or similar terrorist organizations.

His addition suggests could be ordered to register with the police, who would have wide rights of search.

There will be no appeal from the decisions of the home secretary. The legislation will have a life of two years and is considered purely an emergency enactment.

Busy Shipping Season

Expect Considerable Grain Movement At Port Churchill This Year

The Pas, Man.—First wheat train destined for Churchill this year left here with 60,000 bushels of last year's crop. Although no steamer bookings have been received at Churchill as yet, elevator officials anticipate a busy shipping season. At present there is a hold-over of 2,200,000 bushels in the elevator, which will be supplemented by 450,000 bushels of last year's western Canada yield scheduled to arrive during the remainder of this month.

Last summer approximately 1,000,000 bushels were moved from Churchill by three grain freighters.

Credit For New Zealand

London.—Great Britain has granted a \$9,000,000 (\$42,120,000) credit to New Zealand. Walter Nash, New Zealand finance minister, said. Of this sum \$3,000,000 will be expended on national defence and \$4,000,000 will be devoted to purchases in the British market by private dominion importers.

New Air Service

Germany To Use Six-Motor Plane For Atlantic Transport

New York.—Germany is planning to start before next summer a North Atlantic air transport service with a six-motor plane weighing from 80,000 to 90,000 pounds.

Subject to the issuance of a landing permit by the United States government, the plane, accommodating probably from 50 to 40 passengers, will be used on the first non-stop service between Lisbon, Portugal and New York, a distance of 5,000 miles.

Jewish Immigration Into Palestine Causes Unrest Among Arabs

London.—Colonial Secretary Malcolm MacDonald charged in the House of Commons illegal Jewish immigration into Palestine was being fostered to discredit the British administration there and was "producing the gravest unrest among the Arab population."

Illegal immigration, he said, was "designed by its authors" to make the population "suspectious of the sincerity of His Majesty's government in carrying out the white paper policy."

"It is an organization to smash the white paper policy," he said, "and it is a position we cannot tolerate."

After the debate the house upheld the colonial secretary 188 to 119 in a symbolic vote rejecting a Labor amendment to reduce by £10 (\$48) the appropriation for the colonial office.

Alfred Duff-Cooper, Conservative,

former first lord of the admiralty, suggested Great Britain reverse completely its Palestine policy and mark the country out for the Jews.

Mr. MacDonald retorted such a move would cause Moslem leaders to lose all faith in the British nation.

The discussion arose when the Labor opposition attacked the government's recent order suspending immigration to Palestine for six months because of illegal Jewish immigration into the country.

(The white paper call for creation of an independent Palestine after a 10-year preparatory period. In such a state, Arabs would be a permanent numerical majority.)

Mr. MacDonald said that since April 1, 4,877 Jews have been captured trying to enter Palestine illegally, and estimated that between 500 and 1,000 have succeeded in doing so. He added that 4,000 Jews are now aboard ships which are trying to put them ashore in Palestine illegally.

THIS PAPER has no political obligations to any party—its opinions are its own. Our support goes to those we have faith in.

THE COLEMAN JOURNAL

Published Every Thursday at Coleman, Alberta. Membership in Canadian Weekly Newspapers Association and Alberta Div. C.W.N.A. H. T. Halliwell, Proprietor.

NOTES AND COMMENTS

THE Editor of this paper plans to spend the next two or three weeks in Eastern Canada and the State of New York. The annual convention of Canadian Weekly Newspapers Association will be held at Niagara Falls, Ont., next week, which will be attended by weekly newspaper publishers from all parts of Canada.

LAST year we invited anyone who believed they could make a fair job of editing a newspaper to take the editorial chair during our absence. Nobody accepted the invitation. Some editors followed the practice, and interesting results followed. In one town in Ontario service organizations accepted the invitation, and it was interesting to read the newspapers they edited, giving their ideas on how a newspaper should be conducted and what it could do to promote community welfare.

THOUGH a newspaper must be operated on a business basis, yet it is different from a retail store selling goods which are marked up at so much above cost price in order to turn a profit. White space is the commodity a newspaper sells, and its value in service depends on what the publisher prepares and prints. But there is much time and labor involved which brings no monetary return, yet it must be given if a newspaper is to properly serve its community. Usually too little value is placed by retailers on the service given by a newspaper, yet by their cooperation it can be made a forceful influence for developing buyer goodwill. A weekly newspaper such as The Journal is not an advertising sheet; true it must have advertising revenue but it must be something more than a cold business proposition if it is to be of real service. It must stand for something worthwhile; it must have opinions of its own, which others have the privilege of criticizing, but what does the ordinary person think of a paper which is afraid to express an opinion or hasn't any?

HOWEVER, we must not develop into a controversy on the eve of our departure. A change from the daily round and the common task is good for all, particularly a newspaperman whose occupation is inclined to make him cynical. Getting a view from a distance of one's occupation and the town in which he lives is a good thing. We obtain a more balanced perspective, and appreciate the good points to a greater extent than if we never get away from it. It is our experience that after travelling over the plains, the mountains always appear to have a welcoming influence, and for that reason, if for no other, it does us good to get right away for a brief spell every year.

IT was refreshing last week to attend a political meeting which dealt with practical things instead of mystical theories. In the last few years there has been a tendency on the part of many to chase "will o' the wisp" proposals which fade into nothing. The more government interference there is in business the more expensive it is liable to become for the ultimate consumer. There is not a tax imposed which the ultimate consumer can escape. The manufacturer,

the jobber, the wholesaler and the retailer pass it on to the ultimate consumer, who can't even pass it on to the family cat by kicking it out the back door. Government operation and interference in business usually adds to the expense. Competition is the greatest safeguard to the public. Government competition with private enterprise does not work to the common good, and leads often to political manipulation for a favored few who are friends of the party in power.

PARALLEL parking with the sidewalk should be put into effect on Main street. With cars parked on both sides of the street at almost right angle with the sidewalk, little room is left for traffic. Besides, it would prevent further damage to the cement sidewalks, which are badly damaged along the curb.

ONE'S observation of some motorists leads to the conclusion that they forget good manners when they get behind a steering wheel. This is particularly noticeably in town. One travelling at a moderate speed of say fifteen miles an hour can cover the whole town in a few minutes, yet often you will see motorists speeding as if they were out to make 500 miles in as short a time as possible, disregarding pedestrians who might be crossing a road. Even intersections are overlooked by some in their hurry. Delivery truck drivers also are complained of by residents, whose haste might lead to a child being injured or killed. Auto drivers should remember that common courtesy on the road will prevent many accidents. Life needn't be so hurried that good manners have to be forgotten.

A GOOD story heard recently concerned a minister who decided to give his congregation a demonstration of the evil effects of liquor. The verger prior to the opening of the service, solemnly came from the vestry carrying a tray containing a decanter of water, a decanter of whiskey and a box, and placed them on the pulpit. The usual prayers having been said, the minister launched into his sermon, and warming up to his subject, produced from the box a rather long worm. "Now," said he, "we pour some water on this worm, and notice what effect it has." The worm wriggled a little livelier than usual, and appeared to be quite refreshed. "There," said the minister, "this insect even appreciates the benefits of pure water."

Then, placing the water aside, he poured a little of the whiskey on the worm. After a few feeble squirms, it died, this proving conclusively to the congregation the injurious effects of alcoholic liquors. But the minister's equanimity was rudely shaken when a male voice from the congregation enquired what brand it was, as he was suffering from worms, and would like to get rid of 'em.

"A democracy lacks unity unless it is built on private and public honesty, unless responsible citizenship replaces the selfish demand for rights."

"MORAL re-armament is our most urgent need. We must return to a common faith in God.— From pamphlet issued by World M.R.A.

PUBLIC Utility Services, considering the work they do, are the cheapest things purchasable today.

They are the "servants" in the home. They light the lamps, do the cooking and cleaning, heat the water, operate the washer, provide positive food protection and a constantly varying programme of radio entertainment.

It has been its constant endeavor to render a dependable, efficient service with a full realization of the fact that both must cooperate for the common good.

Coleman Light & Water Co., Ltd.

The Biggest Taxpayer in The Crows Nest Pass

is the coal mining industry, in fact in all Alberta. Millions of dollars of invested capital have helped to develop these mines, in which Labor has taken its part. Despite the most keen competition requiring the utmost efficiency of operation of the mines and in the preparation of coal, the local mines have fortunately maintained a fairly steady output, owing to progressive methods of meeting competition of other fuels and imported coal.

It is to your interest to promote the use of coal, by shipping in goods by rail and travelling by rail. The railroads use the coal mined here. Retailers' customers earn their living by mining coal.

Moving Forward

IN the year 1886, an old gentleman retired from the British Patent Office in London, giving as his reason his belief that "Everything had been invented."
 Today, we can smile at this story. Today, we know that nothing in the world remains static. In business as in life, progress is a necessity. Any business that does not move forward in its methods and studies, goes backward.

A large retail organization cannot rely on its name and past history if it is to survive. How long would we remain in business if we went into the markets of the world and just picked out the merchandise that someone else offered, the styles that someone else suggested, instead of searching and looking and rejecting and selecting until we knew we had exactly what our customers wanted? How many of our advertisements would be read, if we recklessly puffed the quality of our wares or their performance instead of taking time, effort and study to test and verify the truth of all our statements? How much customer confidence would we enjoy if we "Let the Customer Beware" instead of backing every transaction with our guarantee of "Goods Satisfactory or Money Refunded"?

The name "EATON'S" alone doesn't keep our doors open. It's our constant study of the needs and wishes of our customers, our constant use of the experience we have gained through years of successful operations, that ensures the continuing patronage of satisfied customers.

Accidental Is The Verdict on Death of Ferdinand Mary

Fell Beneath Mine Cars Sustaining Crushed Chest and Injuries to Head—Died in Coleman Hospital.

The inquest on the death of Ferdinand Mary, 37-year-old brakeman at International mine, whose death resulted from head and chest injuries while working on C. level on Wednesday morning, July 20, was held in the council chamber on Thursday afternoon, A. Webster, local coroner, presiding. The jury returned a verdict of accidental death, with no blame attached to anyone.

Witnesses called were Dr. C. Rose, who testified as to the injuries, death taking place within two hours after the accident happened, at noon in the miners hospital; A. E. Graham, mining engineer, who submitted a plan of the place where the accident happened; H. Wilton Clark, assistant mine superintendent, Lawrence Cyr, employed on the haulage way, Nick Milo, driver boss, and Angelo Oliva, locomotive driver.

No person saw Mary fall between the cars, though Lawrence Cyr stated that as the mine cars were passing at about three miles an hour, Mary stepped to the bumpers between the second and third cars of a 24-car train. Shortly after he saw Mary's light disappear over the cars, and flagged the driver to stop. Mary was found beneath a car, with his legs over the rail. He immediately notified the driver boss, Nick Milo.

The latter stated that he found Mary under the sixth car. He held the car up to take the weight from Mary's chest, telling Lawrence Cyr to try to drag him out. Being unsuccessful, Milo told Cyr to hold up the car, and he dragged Mary out. His gloved hand had caught in the bolts beneath the car. While engaged in his efforts to extricate Mary, H. W. Clark arrived and he took charge.

Mr. Clark stated that shortly after 10 a.m. on proceeding to No. 49 switch, C. level, No. 2 seam, he found Nick Milo phoning for the doctor, and he arranged to have a stretcher and First Aid men come at once, and also arranged for the doctor to meet the stretcher party. Mary was then on the high side of the entry, parallel to the track, with cuts on his head, and his skull appeared to be fractured. His breathing was very labored and he said his mouth was full of coal dust. He was suffering from shock, though he did not appear to be in pain at the time.

Five empty mine cars passed, the first and second were on the rails, but the next three were derailed, but all coupled. Mary had already been extricated from beneath the car when Clark arrived.

Angelo Oliva, locomotive driver, stated the first he knew something was wrong was when he felt his engine drag. He had not seen the signal from Lawrence Cyr, but immediately stopped the engine. He considered that Mary was competent at his work, and was well acquainted with the area in which he worked.

Mike Joyce asked questions of several of the witnesses, and Mines Inspector Evan Morgan was present on behalf of the Mines Branch. The International Co. was represented by J. J. McIntyre, mine superintendent. The father of the deceased, from Calgary, was present at the inquest, and officials present sympathized with him in his tragic bereavement. He was badly shaken by the news of his son's death, which was conveyed to him by telegram. With his wife, he came to Coleman on Thursday morning.

Heartfelt sympathy is felt for

Presentation at Blairmore to Mrs. Vaughn

The I.O.D.E. Chapter at Blairmore and the United church choir joined in a presentation last week to Mrs. W. A. Vaughn, who with her husband will leave in August for a tour through the States, later to settle down at their old home at Wolfville, N.S. A travelling case was presented to Mrs. Vaughn, and earlier in the week the Ladies Aid presented her a silver bon-bon dish. The I.O.D.E. presentation was made at the home of Mrs. John Angus McDonald. Mr. and Mrs. Vaughn have lived in Blairmore for fourteen years, Mrs. Vaughn having sung in the choir and at times acted as organist. Mr. Vaughn is well known as salesman for Western Grocers Ltd., from whose service he is resigning after many years with the company.

Legion Club Has Inviting Appearance

The interior of the Canadian Legion club is steadily improving. Chesterfield and easy chairs are inviting and on the walls Fred Founds is demonstrating his art by painting pictures reminiscent of Bainsfather and "the Better 'Ole." Members who have worked on excavating and painting are deserving of praise for their diligence, and at last it appears that the objective of the Legionaires is to be achieved. It will be a rallying point for the ex-service men of Coleman, and the committee responsible for getting the building ready deserves commendation. May their efforts be attended with success. Ex-service men can back them up by becoming paid-up members of the branch.

Maycroft Opens Community Hall

Last Friday night a dance was held in the new community hall at Maycroft, several miles north of Lundbreck. The hall was built by voluntary labor and material given by ranchers of the district. Harry Hughes, Coleman's "tonorial artist," who also is an artist as a trap-drummer, went out to assist the orchestra. His brother Charlie is forest ranger at The Gap, and he also plays an instrument in the orchestra. A right merry time was enjoyed till 4 a.m., the dancers departing for home as daylight was dawning.

Ferdinand Mary Funeral

Service was held at St. Paul's United church at 2 p.m. Sunday, Rev. Mr. Kettles, who is substituting for Rev. J. H. Bevan, conducting the service. Many friends of the family followed in the funeral procession, and the pall-bearers were neighbors and men with whom he worked, namely: Alex. Chalmers, Angelo Oliva, Bill Bell, E. Henriet, Nick Milo and Frank Matkovik. Interment was in Coleman Union Cemetery.

Local News

W. H. Smith, government liquor vendor, is on his holidays, being relieved by Mr. Clark of Blairmore Store.

Laura Antle and brother Bill, accompanied by Peggy Devine, of Cadomin, are spending a few weeks vacation at the Gap.

G. D'Amico's fine new bungalow, constructed by J. S. D'Apollonia, is nearing completion. It is on the east side of town.

the wife and 15-year-old daughter of the deceased, and his parents, Mr. and Mrs. Desire Mary. Mr. Mary senior worked in the mines here for eighteen years, leaving here to live in Calgary in 1929. He stated that his son had worked with him in the mine when he lived here.

The jury were Charles Murphy, Robert Gillies, J. Chalmers, Robert Morris, Angus McDonald and John Holyk, foreman.

Local News

Mrs. John Peaver is visiting her parents, Mr. and Mrs. Harry Antle.

Mr. and Mrs. Haysom spent Sunday at Bovey Lake west of Pincher Creek.

Miss Helen Fischer, of Spring Point, is the guest of Mr. and Mrs. T. Holstead.

Mr. and Mrs. Arthur Jones and Ronnie and Alf. spent Sunday at Waterton Lakes.

Mr. and Mrs. J. M. Allan left on Sunday for two weeks vacation at Couer d'Alene, Idaho.

Mrs. Alex. Henderson, of Lethbridge, is the guest of her mother, Mrs. Wm. Pryde, for two weeks.

Mr. Neilson, who recently sold his house on Fourth street to Mrs. Wagner, is planning a new house on lots at the east end of Seventh street.

Mrs. M. Joyce, with her daughter, Mrs. Woodward, of Trail, has been spending a few weeks holidays in Seattle and other Pacific coast cities.

WEDDINGS

Hague-Knowlden

A pretty summer wedding was solemnized at St. Mary's church, Lethbridge, on July 18, when Rose, only daughter of Mrs. Knowlden and the late Mr. Jesse Knowlden, was united in marriage with Rev. John Rayson Hague, eldest son of Mr. and Mrs. Wm. Hague of Raymond, Rev. Victor Smith performing the ceremony in the presence of the immediate families of the bride and groom.

Following a reception at the home of the bride's mother, they left on a trip to the Pacific coast, and are expected in Coleman about the middle of August, when Mr. Hague will resume services as rector of St. Alban's and St. Luke's churches. Best wishes are extended from friends in Coleman and Blairmore.

WORLD HAPPENINGS BRIEFLY TOLD

The Massachusetts house of representatives rejected a proposal to bar married women from state jobs.

The Nova Scotia government will spend \$30,000 this year on reforestation work as an aid to unemployed youth.

At the request of the Nazi government, German war dead buried in France are being transferred to German soil.

The statistical bulletin of the League of Nations reported that Canada led the world in increasing its exports during April and May.

A compulsory census of property, to be taken in conjunction with the national register of manpower has been approved by the Australian House of Representatives.

A South African native boy who was captured by police in 1921 when he was found wandering with a troop of baboons, walking on all fours, has learned to speak.

The Government of New Zealand will appoint a Royal Commission to make a thorough investigation into prices and other aspects of the sheep-farming industry.

The Southwest Africa police of former German territory has been absorbed by the South African police under direct control of the Union of South Africa Government.

Quebec Forest Protection Service announced that there had been 300 forest fires this season and they swept 12,000 acres of woodlands. Only 1,400 acres of marketable timber was destroyed.

British imports of Canadian salmon increased during the first six months of 1930 compared with the same period in the three previous years. Oliver Stanley, president of the board of trade, told the House of Commons.

Survey Of Labrador

Canada Interested In Coast Line In Connection With Defence

Canada is interested in the coastline of Labrador as an element entering into the defence of the country, and a survey of the area is being undertaken by the Royal Canadian Air Force.

It could not be ascertained if the present expedition to Labrador will choose places where aircraft may be stationed. The extent to which these would be garrisoned would lie with the British government which is responsible for the defence of Newfoundland and Labrador.

It is understood, however, Canadian defence authorities have represented that efforts undertaken by this country for the defence of the Atlantic must be tied up with the defences of Newfoundland. To establish air bases on the Canadian mainland south of the St. Lawrence or at Anticosti island would be to carry out only a part of the task necessary to ensure the security of the Dominion.

The Labrador expedition has also the background of those apprehensions voiced in parliament last year to the effect that enemy bombers entering Hudson Bay could, from some of the islands within the bay, bomb at will most of the industrial centres and the thickly populated districts of eastern Canada.

Favorite With Canadians

Lord Mottistone Was In Command During Great War

Lord Mottistone is 71. Few men, says the Glasgow Bulletin, enjoy a wider popularity than his lordship, who, until his elevation to the peerage, was universally known as General "Jack" Seely. To him adventure is as the breath of his nostrils. During the South African War he served with distinction in the Imperial Yeomanry, and while absent on that campaign he elected M.P. for the Isle of Wight. In the Great War he commanded the Canadians, who adored him; and for more years than he cares to remember he has been a member of the lifeboat crew in the Isle of Wight.

Sturdy Air Engines

For all Germany's vaunted aircraft strength their Nazi-made copies of the Pratt & Whitney engines have to be stripped down after every 35 or 40 flying hours, states Neil O'Hara, in New York Foot. "The sturdier British engines can last 300 hours before they have to be stripped."

The treasure of the former emperors of China is valued at more than \$20,000,000.

A newborn baby has 270 bones; but some of these join, and a full grown adult has only 206.

Three Have Been Mentioned

London Paper Names Possible Successor To Lord Tweedsmuir

The Duke of Devonshire, the Duke of Buccleuch and the Earl of Dufferin are British noblemen named by the London Daily Express as possible successors to Lord Tweedsmuir as Governor-General of Canada.

"If this office is to become a reward for talent and ambition," says the Mail article, "Canadian people would prefer one of their own countrymen to hold it. On the other hand, if someone from Britain is chosen, Canadians would like him to be as near royalty as possible.

"Imperial sentiments now are strong in Canada's veins. The Duke of Devonshire, the Duke of Buccleuch and among Canadians there is a widespread feeling that nothing should be left undone to enhance and spread the dignity of the crown in their Dominion. Canada envies the Australian Commonwealth the appointment of the Duke of Kent as Governor-General."

The Duke of Buccleuch, succeeded to the title in 1938. In 1920, as Earl of Dufferin, he present duke served as aide-de-camp to the Duke of Devonshire, then Governor-General of Canada. In 1921 he married Miss Esther "Mollie" Lascelles. The wedding was attended by members of the royal family.

The present Duke of Devonshire has behind him a distinguished career as soldier and diplomat and the auspicious example of a successful former Governor-General of Canada by his father. The late duke was one of the most popular of all the royal representatives sent to Ottawa.

The Earl of Dufferin also has a strong Canadian bond. He also was an aide-de-camp to the Duke of Devonshire at Ottawa. In 1925 he married the late duke's daughter, Miss Sarah Cook of Montreal, a match that caused international interest, because her sister had become Countess of Minto. The earl has visited Canada several times since his marriage.

New Chemical Discovery

A Synthetic Vitamin That Stops Internal Bleeding

In one of the greatest scientific feats ever recorded, four groups of chemists, working independently, reported simultaneously the synthesis of vitamin K, the new vitamin that stops internal bleeding.

Although hemophilia, the "royal cure" type of bleeding, is not much affected by the vitamin, it stops bleeding in a large number of less spectacular but far more numerous cases of internal bleeding.

The vitamin previously was extracted from alfalfa. The chemists made it from coal tar. To the surprise of the scientific world, the artificial vitamin has four times the potency of natural vitamin K. Hardly ever is a synthetic chemical so much better than the natural one.

The "tip" which set four groups of scientists simultaneously on the trail of the synthesis is even more unusual than the unprecedented fact of four sets of workers succeeding at the same time on a chemical job that usually takes years. The clue came from tuberculous germs.

From the bodies of these germs, at Yale University a few years ago, was extracted a substance, previously unknown substance. It was named phytycol. Recently it was discovered this oil contained something, a chemical made by the bacteria, which had vitamin K activity.

Must Stand Great Strain

Life Of Automobile Tires Has Been Considerably Extended

We can remember that in the early days of motoring punctures and blowouts were quite frequent and the life of a tire was only about one-quarter that of the tires to-day. That punctures and blowouts are less frequent to-day speaks well for the tire manufacturers when it is considered that an automobile tire carries an average of 44 times its weight and in running 25,000 miles it must withstand the strain of approximately 19,000,000 revolutions—Oshawa Times.

A New Jersey man has made electric motors only one-half as large as a postage stamp to drive a miniature airplane.

A mast 1,111 feet high, erected at a German government rail station, is reputed to be the tallest structure in Europe.

Orange juice does not lose an appreciable amount of vitamin C for 24 hours, if stored in a refrigerator, latest experiments show.

In Huntington library, San Marino, Calif., is a volume, Omnia Khayyam that weighs only one-fourth of an ounce. 3217

Provides Electric Power

Volcano In Italy Runs Railway And Lights Up Towns

In the Valley of Hell near Lardarollo, volcanoes are providing electric power for Italy.

Fascists assert with pride that only in Italy is volcanic vapor harnessed for conversion into electric power, a project that is part of Premier Mussolini's program to make Italy economically self-sufficient.

Production has been increased this year and eight turbine plants now turn out 33,000,000 kilowatt hours of electricity a month furnishing power for the electrified Pisa-Rome railway line and light and power for several towns.

Use of this steam saves Italy from importing about 600 tons of coal a month.

Southern Tuscany has always been famous for the eruptive cones in its limestone mountains and for geysers of volcanic water vapor. The Valley of Hell—Valle dell' Inferno—at the side of Mount Cerrubi, is a particularly hot spot.

The subsoil has volcanic steam and water, which produces geysers, as it gushes forth a residue of boric acid and other chemicals is left which has been turned to commercial use for a long time, but only recently has the steam itself been used.

Wells have been drilled, some of them 1,000 feet deep. Just before the level of steam is reached the workmen retreat and wait for the rocks to cool.

Bluffs, mud, lava and steam sometimes shoot 1,000 feet into the air, wrecking the drilling equipment.

A well is allowed to "clean itself" for a few weeks, and then is capped when its steam is gushing freely.

There are 286 wells in the Valley of Hell supplying pipelines to power plants of the vicinity.

Will Remain A Member

South Africa Believes In League Of Nations Status Hertzog

The League "even now is a haven of refuge for all the smaller states" in the opinion of General Hertzog, Union Prime Minister.

In a speech in the Senate defending the League of Nations, General Hertzog said:

"We do not sufficiently take into consideration not only 'how abnormal' the times have been, but what the League of Nations, notwithstanding its original faults and weaknesses, has been able to achieve."

General Hertzog told the Senate that it was in South Africa's interests to remain a member of the League of Nations.

HOME SERVICE

TREAT JANGLED NERVES WITH UNDERSTANDING

"If that telephone rings again, I'll scream!" Mrs. Jones, tortured by frayed nerves.

Perhaps you, too, are the high-strung type that flies off the handle at small things. You lose your charm! Why not try to understand your nerves, turn your sensitive reactions into vitality, magnetism? Your eagerness may come from a reserve, a proud attempt to conceal, repress your deeper emotions. Find a harmless outlet for them. A good cry in private is no disgrace and vigorous action helps to "soothe" the nerves.

If your physical health is run down—often a factor in nerves—get a little extra sleep, spend a while each day sun-bathing.

And wise to check up on your diet. Are you getting plenty of vitamins, minerals? Know what foods contain vitamin B, so valuable to nervous people.

Make your nerves an asset, not a liability. In our 32-page booklet a well-known physician discusses physical and psychological causes of nerves. Gives proper diet and body care, tells how to overcome worry, emotional factors, helps you build a richer, happier life.

Send 15c in coins for your copy of "Overcoming Nerves—And Every-Day Health Problems." Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

In addition to the feature release, the following booklets are also available at 15c each:

118—"Good Table Manners";

128—"Developing Our Personality";

138—"Secrets of Good Conversation";

154—"Etiquette For Young Mothers";

SLIMMING PANEL-FRONT

By Anne Adams

"This becoming 'pound-wise' dress designed by Anne Adams knows just what to do with those extra pounds of yours. They'll almost disappear under the spell of its magically slenderizing lines. Yet Pattern 4174 is miraculously easy to use under the directions of the accompanying Sewing Instructor. The slimming yoke and the lapped panel down the center front may be cut on the bias or straight. See the well-shaped neckline, the fulgurated ease of the bodice. You might make soft, flared sleeves—they're very cool. Or have them puffed with gathers held in above the elbow. Add a cool touch with frostily white lace, and trim with buttons.

Pattern 4174 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 38 takes 3 1/2 yards 39 inch fabric and 2 1/4 yards edging.

Send twenty cents (20c) in coins (straw cannot be accepted for this Anne Adams pattern). Write plainly: Size, Name, Address and Style Number. Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

SELECTED RECIPES

FRUIT SALAD DRESSING

- 1 egg
 - 1 tablespoon sugar
 - 2 tablespoons Crown Brand Corn Syrup
 - 1/2 teaspoon Benson's or Canada Corn Starch
 - 1/2 teaspoon mustard
 - 1/2 teaspoon salt
 - 1/2 cup orange juice
 - 1/2 cup elder vinegar
 - 1/2 cup cream, whipped
- Method: Break egg into top of double boiler; add sugar, Crown Brand Corn Syrup, corn starch, mustard and salt. Beat all vigorously until there are no lumps in the mixture. Now add fruit juices and cook in top of double boiler until mixture begins to thicken. Stir in vinegar and again cook for 10 minutes. Strain, spread on cold food in the stiffly whipped cream. This makes a delicious salad dressing for all fruit salads. (Yield 1 pint.)

MAINE BLUEBERRY CAKE

- 2 1/2 cups sifted flour
 - 2 1/2 teaspoons Calumet Baking Powder
 - 1/2 cup sugar
 - 1/2 cup butter or other shortening
 - 1 cup sugar
 - 1 egg, beaten
 - 1/2 cup milk
 - 2 cups blueberries
- Sift flour once, measure, add baking powder and salt, and sift again. Cream butter thoroughly, add sugar gradually, and cream together well. Add egg and beat very thoroughly. Add flour, alternate with milk, a small amount at a time, beating after each addition until smooth. This makes a stiff batter. Fold in blueberries. Turn into greased 12x8x2-inch pan, spread evenly. Bake in moderate oven (350 degrees F.) 45 minutes.

Date Has Been Fixed

King George's Birthday In 1940 Will Be Celebrated June 13

The King's birthday in 1940 will be celebrated in London and at military stations at home and abroad on Thursday, June 13. In the case of customs offices the royal birthday will be observed Saturday, June 22. The King's actual birthday is Dec. 14, but a date in June is chosen each year for the official birthday celebrations.

Cattle from Sandringham, exhibited by the King, were one of the features of the Essex Agricultural Show in Harlow, England.

The Lincoln highway in U.S. is more than 3,300 miles long.

SUNDAY SCHOOL LESSON

JULY 30

JEHOSEPHAT: A LIFE OF OBEDIENCE

Golden text: Seek ye first his kingdom, and his righteousness. Matthew 6:33.

Lesson: II. Chronicles 17:1-19.

Devotional reading: Matthew 7:21-27.

Explanations And Comments

Jeheosephat's Power and Obedience 2 Chronicles 17:1-19. On Asa's death, Jeheosephat his son reigned over the kingdom of Judah. Israel's King Ahab had strengthened himself by his alliance with Sidon, and there was need for Jeheosephat to strengthen himself against Ahab. Rehoboam had fortified the cities (2 Chronicles 11:5) but Asa had taken them (2 Chronicles 15:8), and the first thing Jeheosephat did on his accession to the throne of Judah was to fortify the cities on his frontiers and to put stronger garrisons in the cities of Ephraim of which he was master.

Jeheosephat walked in the first ways of his father David. "Father" is used in the sense of ancestor; the first ways may mean the ancient ways or the reference may be to the ways of his father David. In the Septuagint Version David is omitted, and thus the reference is to his father Asa, whose first ways were his first ways. He had no traffic with the Baalim. Baalim is the plural of Baal, and Baal is a common, not a proper name, given to the various gods worshiped by the idolatrous neighbors of the Hebrews. Jeheosephat's Jehovah was different according to his commandments, and not according to the evil ways of the people of the Northern Kingdom, where the worship of the Sidonian Baal had been introduced by Ahab, Jeheosephat's contemporary. Therefore Jeheosephat's kingdom prospered and all Judah brought him tribute. The thought of a connection between obedience to God and national prosperity, and disobedience and national disaster, runs through the Book of Chronicles.

The king's heart was lifted up, with pride as was Uzziah's, 2 Chronicles 26:16. In obedience to the laws of Jehovah. He took away the high places and the Asherim out of Judah. Asherim is the plural of Asherah, the name given to Canaanite goddesses. Before the Hebrews came to the land of the Canaanites had worshiped their gods on the "high places", the hill tops. These high places were associated with heathen elements—stone pillars and wooden poles—they were improper places for the worship of Jehovah according to the margin rendering for the verb translated lifted up. Jeheosephat was diligent to do away with his reforms and deal effectively with his places for idol worship.

Find Easy Job

Police Find Crowds At New York Fair Well Behaved

The World of To-morrow, take it from the police and hospital authorities, is a peaceful sort of place where nothing much ever happens in the way of crime and illness is virtually unknown.

Although on July 8 12,000,000 persons had passed through the New York World's Fair gates since the April 30 opening, only five had been arrested and only 37 required hospital treatment.

The arrests, said Chief Inspector Richard Sheridan of the fair police, were all for misdemeanors, such as those of the uninhibited gentleman who stripped and went swimming in a fountain pool at 3 a.m. and the high flier who clambered up the parachute-jumping tower after the closing hour, got scared, and had to be helped down.

None of the arrests has been for drunkenness, and even if there were any "we intend to sober 'em up," remarked the chief.

The job is a yawn-producer. Pickpockets? They haven't got a chance, opined the chief. Camera-men encourage pickpockets with their promptly back into the world of to-day.

We wait until they get inside," explained Sheridan, "because it's a pleasure to take the 75-cent admission fee from a pickpocket."

Objected To Pay

Dr. Thomas Robertson, inspector of Indian agencies, reports Indians on Little Pine reserve in northwestern Saskatchewan objected to being paid one dollar a day for clearing brush on the reserve, advising the inspector that they would accept 50 cents. Arrangements were made for the Indians to get needed groceries and four dollars a month for clothing, this working out at 65 cents per day.

Sark, an island in the English Channel refused to desert its language, a form of old Norman French, which is understood by only 500 people.

John Bull has developed, through the centuries, a technique in loaning money to other countries, which Uncle Sam cannot hope to match overnight.

TOPICS OF VITAL INTEREST

by DR. J. W. S. McCULLOUGH

SUMMER WARNINGS

Warning signals have been put up by the Health League of Canada in the hope of reducing the number of preventable deaths of summer vacationers.

First, there is the resumption of the campaign commenced last summer to extend a knowledge of artificial respiration and to impress upon those in charge of supposedly drowned persons the need for continued efforts, for hours if necessary.

Then, there have been the League's many warnings against the use of raw milk.

In addition, at this season it is pointed out that every case should be taken to ensure the utmost sanitation by the burning of waste, with care lest the fire spread. No waste material should be allowed to reach the waters of spring, river or lake.

Foisoning should be avoided and summer living quarters screened against flies and mosquitoes. All food, of course, should be screened, and if possible refrigerated.

Diets should be given attention, green vegetables replacing many of the sugars, starches and fats.

Light-colored, loose-fitting clothing should be worn, changes of underwear should be frequent, with the daily use of the bathtub.

Finally, there is the warning that while sunlight supplies the valuable Vitamin D and is known to increase one's power of resisting disease and to promote health generally, there is such a thing as danger from an excess of sunlight. The skin and the eyes should be guarded against too much strong sunlight. Twenty minutes to one half hour is sufficient for most people to expose themselves the first day out in a bathing suit.

Do not drink water from an unknown source without first boiling or chlorinating it. The Department of Health in Ontario and some other provinces supply chlorinating materials for campers at a nominal charge on request.

Editorial Note: Readers desiring the complete text of Dr. McCullough's cancer articles at what may secure same by writing to—The Health League of Canada, 165 Bond St., Toronto, Ont.

Will Use New Type

India Plans Silent Motion Pictures For Educating The People

A new type of silent motion pictures designed to bring enlightenment to India's millions and perhaps to illiterate groups throughout the world has been proposed at Hollywood.

J. Patel, a Bombay photographer, said the films would be silent to overcome the handicap of India's 12 principal languages and 300 dialects. They would be uncaptioned because few members of the prospective audiences can read. Captions of captions booklets will be provided to theatres, in the vernacular of each district, explaining the picture, he said. The booklets will be read by lecturers who, trained in the work, may add comment as the picture is screened.

"The pictures themselves, while telling stories, will be really constructive—travelogues and technical films showing the industries of other lands—and when possible will be made in India," Patel said. "In this manner, I believe, we can reach all of India's 400,000,000 inhabitants with messages against child marriage and uncleanness and for an improved economy."

Health Insurance

Speaker Expresses Opinion That It Will Be Adopted Sooner

Or Later

Health insurance in some form is inevitable and will be adopted sooner or later, no matter what obstacles are placed in its path, Dr. J. A. Hannah, head of Associated Medical Services, Incorporated, told a service club gathering at Kingston, Ont.

"Whether we like it or not, we are going to get it," Dr. Hannah said. He told of the rapid development of an organization's scheme in Toronto, a contributory plan whereby persons in moderate circumstances may obtain medical attention and hospital treatment.

**Pucksters Lose
 Hard-Fought Game**

Angelo Gentile's Strategy Fails
 to Overcome Heavy Hitting of
 President George Fisher's Natal
 -Michel Bufaloes—Near Fight
 at Finish

Though losing Wednesday
 night's game to Michel-Natal by
 a disputed score of 10-9, Coleman
 Pucksters still retain the lead in
 the baseball league, which in-
 cludes six teams of the various
 Pass towns from Fernie to Hill-
 crest.

It took three pitchers of Cole-
 man team to go through the
 game, while for the visitors Tom
 Krall pitched. Marconi, Fields
 and Schnepf were in turn in the
 pitcher's box for Coleman.

What looked like a raw de-
 cision by the umpire was a put-
 out on third base of Miller Flem-
 ing when there was another man
 to go to bat for Coleman, with a
 good prospect of tying the score
 or even winning the game. So
 heated did the dispute develop
 that fists began to fly, but cooler
 reason prevailed.

George Fisher, president of the
 Natal-Michel club, came along
 with the team, as well as several
 other boosters for the visiting
 team.

The majority of Coleman's
 team are members of the senior
 hockey team. Bill Gate as catcher
 is as good as ever, even
 though he has been playing for
 more years than most people can
 remember. The field handicaps
 the players, as it is very rough
 but despite this some good field-
 ing by both teams was seen. In
 one hit which should have been
 good for a single base, through
 the ball being lost in the weeds,
 Tom Krall, Natal's pitcher scored
 a home run. The game fin-
 ished in a poor light, going the
 full nine innings.

IN MEMORIAM

IN LOVING MEMORY of my dear
 husband, Joseph Fox Bell (Joe) who
 passed away July 19th, 1932.
 "Surrounded by friends I am lone-
 some.
 In the midst of my joys I am blue.
 With a smile on my face I've a
 heartache.
 Longing, dear husband, for you."
 —Sadly missed by his loving wife,
 daughter, son-in-law, Donald and
 mother at Nanaimo, B.C., also Ivy,
 Jim and family, at Edmonton, and
 sister Mary, at Wigton, England.

San Francisco Chronicle: They
 think now that Roosevelt will become
 an editor when he lays down the
 political reins. A ringing veto message
 with each rejection slip would be new.

Local News

Buy from Journal advertisers;
 they deserve your business.

Mrs. Norman Smith, of Leth-
 bridge, is the guest of her par-
 ents, Mr. and Mrs. Jack Derby-
 shire.

Mrs. Helen Nash is spending
 a short vacation at Kimberley,
 the guest of her sister, Mrs. Ken
 Blain.

Mr. and Mrs. Archie Burrell
 and family, of Drummheller, re-
 turned to their home on Monday
 after visiting relatives here.

There is only one BEST for
 building up local trade, and that
 is The Journal and The Bulletin.
 Always buy goods advertised in
 these papers.

Mr. and Mrs. George Jenkins
 and children and Mrs. Andrew
 Dow spent several days camping
 at McBain's Lake, which was
 thoroughly enjoyed.

Mr. and Mrs. Wm. Chapman
 left this week for four weeks va-
 cation in California. While
 there they will visit their son
 William in Los Angeles and also
 the San Francisco Exposition.

Mr. A. A. Pruett and daughter
 Nellie of the Grand Union hotel
 are spending a holiday in Van-
 couver, and in their absence Mrs.
 Arnold, of Pincher Creek, daugh-
 ter of Mr. Pruett, is at the hotel.

Town Council
 (Continued from Page 1)

The band consists of 26 mem-
 bers. Estimated cost of the
 uniforms would be about \$1,000.
 The delegation stated that 90
 per cent. of the workers in Inter-
 national mine had promised 10c
 monthly for an indefinite period
 for the band. McGillivray mine
 has not yet been canvassed.
 Council deferred the matter till
 next meeting.

Mayor Pattinson was author-
 ized to contact Mr. Bradley, in
 charge of provincial road work,
 and try and borrow the govern-
 ment roller. The roller will be
 used in the town's road work
 which will be started within the
 next few days.

Local News

Messrs. Alex. Muir and George
 Robertson, of Alexo, are the
 guests of Mr. and Mrs. Robert
 Gillies. They are enroute home
 after several weeks visit at San
 Francisco Exposition. While in
 Coleman Mr. Muir visited his
 sister, Mrs. A. Beveridge, and
 Mr. Beveridge.

The Boy Scouts under Scout
 masters N. Nicholas and Fred
 Weir went to Waterton for a
 week's camp. Seventeen were
 in the party, and Sam Segoff's
 truck, for which a special permit
 was secured, transported them
 and their luggage, and will bring
 them back next Sunday.

C. Devine, former master mech-
 anic at International mine, ac-
 companied by Tom Carr, George
 Pryde and Ed. Smith, came down
 from Cadomin last week for a
 few days holiday. Peggy,
 daughter of Mr. Devine, came
 with them, and is at present
 camping at The Gap with Laura
 Antle and brother Billy.
